

Montpelier

Granite Street Bridge 17

Montpelier BF BPNT(17)

Project Location: City of Montpelier in Washington County on Granite Street off of US2. This structure crosses the Winooski River. This structure is located approximately 0.53 miles east of Main Street and is one of five structures crossing into neighborhoods surrounding the greater Montpelier area.

PROJECT MILESTONES

This project is currently undergoing review in contract administration and is anticipated for advertisement in July. Target Construction Schedule will be sequenced throughout the summer of 2014.

Project Description:

This project involves cleaning and painting the existing steel superstructure and minor associated work.

Target Construction Schedule:

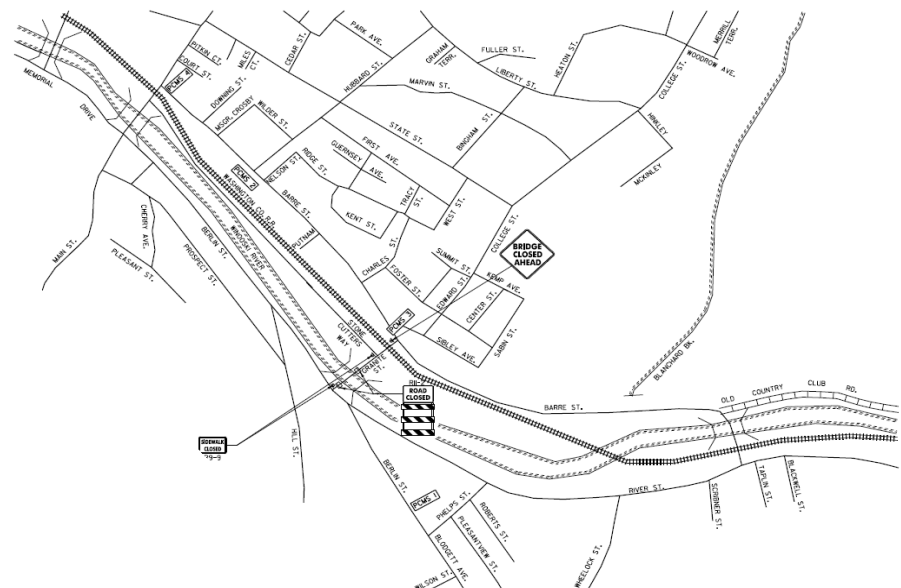

Construction activities will take place beginning in August of 2014. The allowable bridge closure period is three months beginning in August. During the bridge closure period, the contractor will close the Granite street bridge to all traffic for the lead remediation process and associated minor structural repairs and paint. The construction completion date is October 31, 2014.

Advertisement:

This project will be advertised in July.

Detour Route:

During construction, traffic will be rerouted along the other 4 bridge structures crossing the Winooski River into Montpelier. Local traffic and bicycle traffic will be routed onto local roads.
